Job description:

Work Area: Modeling, optimization and simulation

Project overview: The goal with this project is to provide exploratory models for optimization and simulation in the context of new transportation paradigms, in particular concerning new business models (such as Uber and Amazon F lex). More details are available at http://www.dcc.fc.up.pt/~jpp/Announcements/Smiles.html

Objectives: Collaboration in the definition and implementation of models and algorithms for new problems in transportation.

Academic Qualifications:	PhD in computer science, operations research, or similar areas.
Minimum Profile required:	Solid background in programming, optimization, mathematical modeling and simulation.
Preference factors:	Experience in projects in this área.
Monthly Grant:	€1495 according to the Stipends values of the grants awarded directly by the FCT, paid by bank transfer. The grant holder may also benefit from additional incomes in the sequence of a quarterly evaluation process (Clauses 12 and 13 of INESC TEC Grants Regulation and Annex II), up to a maximum of 50% of the monthly grant.

Project duration:	2015-07-01 a 2018-06-30
